

IN THE SPECIFICATION

Please cancel both current specifications. Specifically, (1) please cancel the current specification that describes a connector device disclosed in FIGURES 1-6, and (2) please cancel the current specification that describes an integrated circuit (IC) design verification disclosed in FIGURES 1-2. Please replace both cancelled specifications with the corrected substitute specification attached to this Response. There is no new matter in the corrected substitute specification.

IN THE ABSTRACT

Please cancel both current abstracts. Specifically, (1) please cancel the current abstract that describes a connector device disclosed in FIGURES 1-6, and (2) please cancel the current abstract that describes an integrated circuit (IC) design verification disclosed in FIGURES 1-2. Please replace both cancelled abstracts with the corrected substitute abstract attached to this Response. There is no new matter in the corrected substitute abstract.

IN THE DRAWINGS

Please cancel both current sets of drawings. Specifically, (1) please cancel the current set of drawings (FIGURES 1-6) that describes a connector device, and (2) please cancel the current set of drawings (FIGURES 1-2) that describes an integrated circuit (IC) design verification. Please replace both cancelled sets of drawings with the corrected substitute set of drawings attached to this Response. There is no new matter in the corrected substitute drawings.
